SYSTEMS for Electric**LAB** Electric**EDUCATION** Electric**WORKSHOP**

THAT IS WHAT WE ARE STANDING FOR

COMPANY TRADITION

hera is a part of the family-owned ZECH-Unternehmensgruppe. Mr. Manfred Zech, owner and CEO of hera follows the philosophy of manufacturing all key components within our own company group in order to make sure, that only products of highest quality reach our customers. The success of this policy is reflected in the constant growth of the ZECH-Unternehmensgruppe within its 60 years after foundation. hera is equipped with machinery of latest technology which gives us a great manufacturing depth and thus the flexibility to even realize customized solutions. We are proud that so many educational institutions and industries around the world trust in our quality.

DURABILITY AND SUSTAINABILITY

In 1959 our LS2000 laboratory system was revolutionary, it was the first available bench rack system on the market with integrated devices for electric tests and measurements. Many of those first-generation systems are still in operation on customer-site and still add-ons are demanded. So, we not only provide full service for these products, we still manufacture those, now of course in latest technology.

MODULARITY OF PRODUCTS

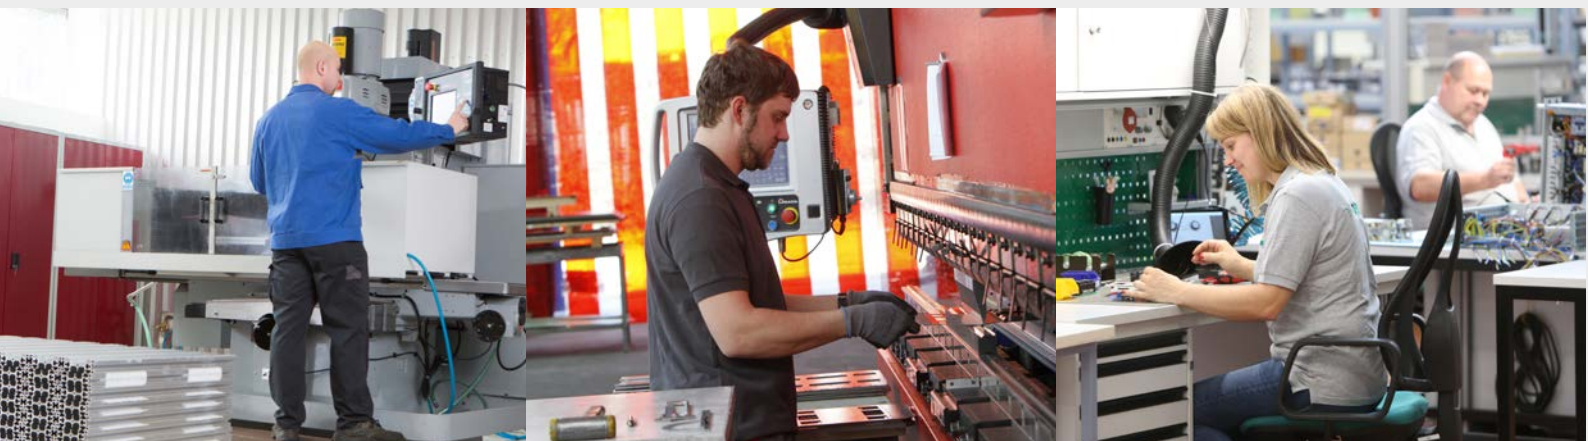

Our furniture is made to last a lifetime, so we are dedicated to develop and manufacture products only of finest quality and durability. Due to the considerable product range and the high-degree of modularity, we are able to realize configurations that fully meet our customers concepts. We do not want you to adapt to our systems but our systems should be adapted to you.

FUNCTIONALITY COMPLIANT TO DESIGN

Attractive product design is a very important topic for hera, but never if it compromises with functionality. Quite contrary, our policy is to make products even more user-friendly. This means, functionality is the main priority when developing new products or doing product redesigns, because we know how important it is to get your processes even more efficient.

COMPATIBILITY OF PRODUCT SOLUTIONS

A complete laboratory system consists of a great variety of individual components. In order to avoid confusion, whenever you need additional products, we consequently make sure that all our new developments are compatible to the present system. Thus an uncomplicated upgrade of your existing system is always guaranteed.

A GREAT DEAL OF **FLEXIBILITY**

Basically we offer benches, standard or ESD in various dimensions with suitable bench racks and a great selection of electrical instruments. But in fact it is much more! - We consequently absorbed the requirements of our broadly based customers over the past 60 years and developed an electrical laboratory system of finest quality, highest modularity and extraordinary variances. As a result we have trusting customers world wide in the field of oil, gas, petrochemistry, defence, aerospace, automotive, machinery construction, telecommunication, administration, research and testing institutions and many more.

Instrument Rack directly mounted on bench top

Suspended Instrument Rack

WORKSTATIONS WITH A MAXIMUM OF COMFORT

Employees are the capital of a company and you invest time and money to get them utmost qualified for their tasks. Shouldn't it be natural to take best possible care of their well being, then? - For this reason we offer all our benches even height adjustable, so they can be used in sitting or standing position. This will reduce the absence quota in your company considerably and thus raise efficiency. hera workstations are certified & recommended by AGR due to their excellent ergonomic features.

X-Lift Quattro Bench

X-Lift Duo Bench

C-Lift Bench

MOBILES AND CARTS

Lots of processes within a company demand full mobility of equipment. Trends like „CLEAN-DESK“ might even increase its significance. We use the product range of our benches and configure a mobile solution according to your special requirements, so you have everything within perfect reach. With respect to your underground or application, we offer casters in different sizes and materials, for different loads in ESD or non-ESD.

PROFI Mobile with modular power legs

PROFI Mobile with HV Tester

PROFI Mobile e.g. for Programming Tasks

19" Test Rack, open or with side panels and door

DIVERSIFICATION STARTS WITH INSTRUMENTATION

Finally it is the electrical equipment, that specifies whether a workstation is for test & measurement, service & repair, R&D- or any kind of manufacturing. For this reason we offer a large range of standard modules which are manufactured according to the latest technology and fully tested on safety and functionality.

Our portfolio holds power supplies and instruments in conventional technology or latest networks integrated IMOD technology which is programmable and fully remote-controllable.

different types of flexibly equipped Media Channels

Pneumatic Modules and Calibrators

DC Power Supplies (conventional, touch or network operated)

Generators and Measuring Instruments

AC Variacs

Motor Testers (optionally with adjustable frequency)

IMOD Multimeter

Power Distribution Units (PDU)

ELECTRICAL WORKSHOP APPLICATION

If you choose the aluminium basing PROFI system or the sheet steel basing FLEX system with keyhole raster, both systems offer high flexibility, a lot of accessory, ESD availability and thus are predestined for electrical manufacturings. The benches can be supplied as individual set-up or integrated in a transfer line. Our standard bench height is 780mm but systems for manual -, hand crank -, or electrical adjustments are available.

FLEX Workshop Bench

PROFI Workshop Bench

MECHANICAL WORKSHOP APPLICATION

For furnishing mechanical workshops we offer bench solutions with solid wood or multiplex. The worktops are available in 30mm or 40mm and either with oiled or glazed surface. Of course even this set-ups offer various options for shelvings or electrifications.

height adjustable with media supply and shelf

Workbench with perforated backplane for tool attachment and shelf

Team Workstation with hexagonal bench rack and vises with lifts

SHIPPING DEPARTMENT APPLICATION

For even more specific workstations we offer a large range of components, attach those to our standard bench and ... voilà, we have for example the perfect packing bench. So if you have any special requirements on your workstations, please ask for our possibilities. We have much more options than stated on our homepage or shown in our catalogue.

PROFI Packing Bench

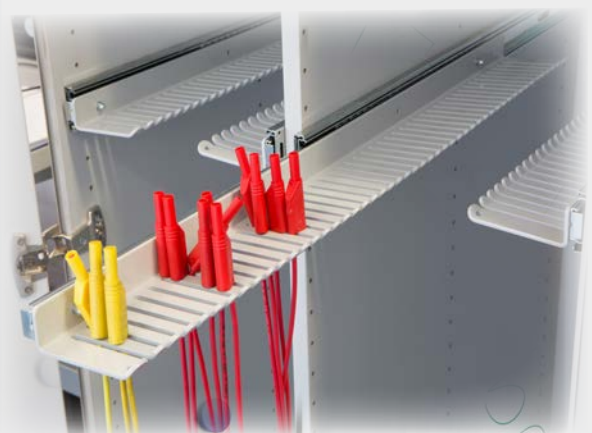

CONTROL ROOM APPLICATION

No doubt, that „SMART FACTORIES“ will shift many activities from humans to machines, while new jobs for control and surveillance tasks are generated. This will also change the requirement on the workstations. Mainly needed is a well arranged ergonomic place with more monitors, preferably on more levels with integrated cable management.

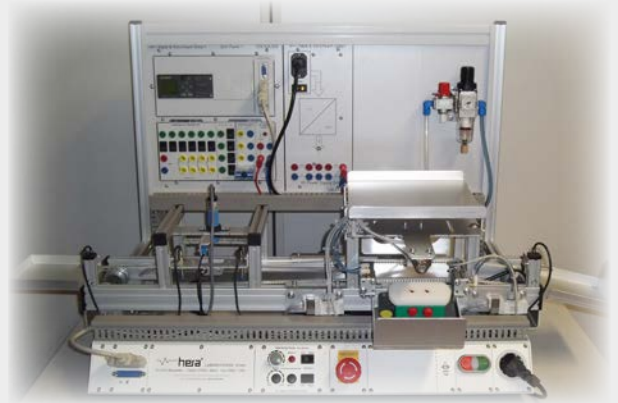

CABINET SYSTEMS, ESD OR STANDARD

The cabinet program of hera bases on a perfectly elaborate modular system, that allows the combination of various elements to an unique cabinet wall. So the complete space between floor and ceiling can be used for storage. The program offers various decors and features. The rear walls are decorative and allow set-up in room centers. Please also ask for cabinet interiors like cable combs, telescopic shelves, training system supports, etc.

EDUCATIONAL APPLICATION

hera Laborsysteme GmbH is not only specialized in industrial equipment but we also offer electrical laboratories and training systems for electric professions such as used in universities, colleges, vocational schools and training centers. Please ask for our educational product line.

Mechatronic Systems with logic controller or PLC for control and automation engineering

Automation Lab with hera furniture and training systems

Training System for Home Automation
